### ULTRA HIGH-SPEED PORTABLE DELUGE SYSTEM

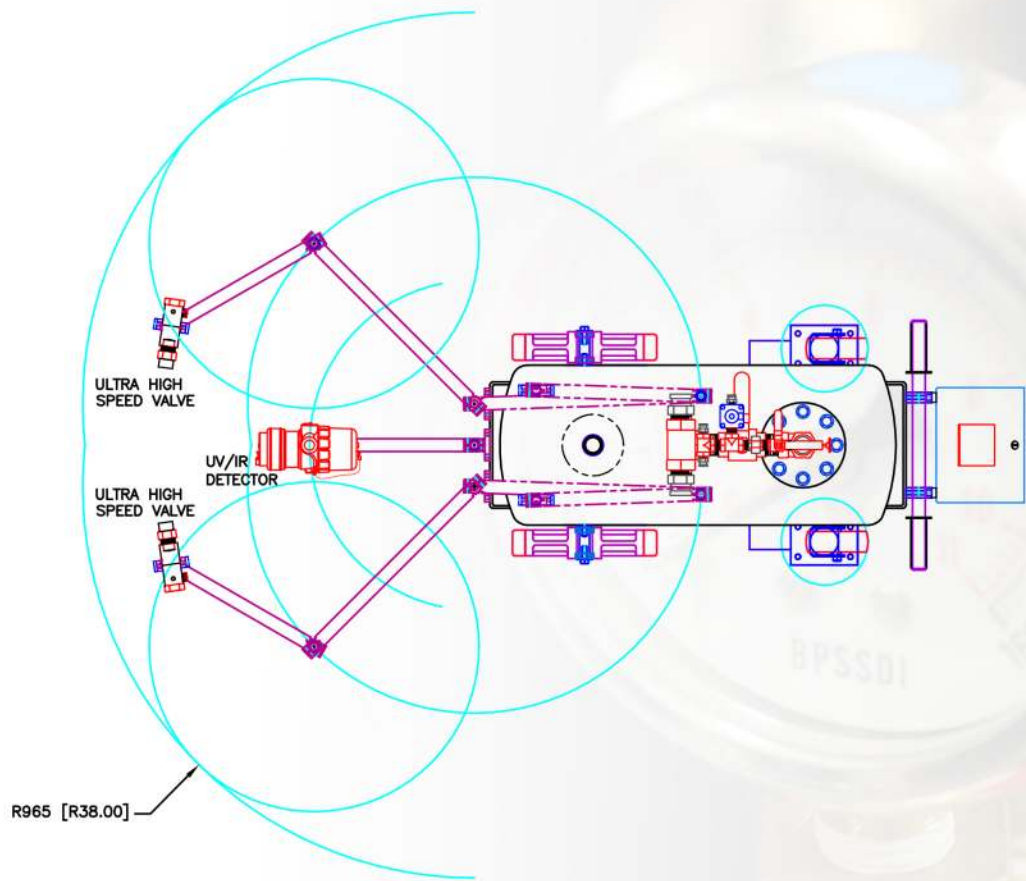

The BR-100 portable deluge system is designed to provide Ultra High-Speed response for use where a reliable adequate water supply is not available. Nitrogen is used to pressurize a custom designed ASME code pressure tank. Flexible hose with quick connections, Ultra High-Speed deluge valve and UV/IR Detector are positioned by the user.

#### FEATURES & BENEFITS

- 24vdc battery and/or plug-in power
- 20 seconds of discharge
- Sub-100ms response time
- Built in detector supports
- Designed to use Det Tonics or Spectrex UV/IR detectors
- 100 Liter ASME code welded pressure vessel
- Narrow design fits through standard doors and hallways
- Digital release controls
- Optional rough terrain chassis

**Easy to set up!**
